

ISN India/Gulf Expo Spring 2008 **February 3rd-February 14th**

Mumbai-Chennai-Ahmadabad -Abu Dhabi-Dubai-Kuwait -Manama

ISN invites you to join us for our India/Gulf Expo Spring 2008. We are again offering some of our most successful Expos. In 2008, we would like to present our Expos in a growing student market, starting with three expos in India in **Mumbai, Chennai and Ahmadabad**. Then our university representatives will meet with students from the Gulf region in **Abu Dhabi, U.A.E.; Dubai, U.A.E.; Kuwait City, Kuwait; and Manama, Bahrain.**

These are countries where demand for American educations grows annually. The American Education Expos are successful year after year, with strong attendance, excellent media coverage, and prestigious recognition by the American and local government during the Expo.

Why these markets?

Mumbai-India

This trip to India could not come at a better time for recruiters. India is mainly a higher education market with 30% of the population interested in undergraduate studies and 70% interested in postgraduate studies. India remains the leading country of origin for students in the U.S. The rising need for skills in a more service sector driven economy has increased the need in higher education. We will host an Expo in Mumbai, one of the great cities in the world. This is a great market to recruit qualified undergraduate and graduate students.

Chennai-India

Chennai is one of the largest metropolitan cities in India. Students are looking for studying abroad, especially in the U.S., where they can receive the best education at both undergraduate and graduate levels. The education market in Chennai has huge potential for growth, as there is an increasing need for skills in a more service sector-driven economy related to the booming economy.

Ahmadabad-India

As the seventh largest urban agglomeration in India, Ahmadabad is also a great place to meet enthusiastic college students. The market potential cannot be ignored by recruiters in search of the brightest, hardest-working and ambitious students. In Ahmadabad, the

number of students who want to study in the U.S. has increased gradually through the past few years.

Abu Dhabi & Dubai-U.A.E.

This is one of ISN's strongest markets. Our eight Dubai Expos attracted thousands of students, along with excellent media coverage. Dubai has recently emerged as one of the most important cities in the world, with a great amount of Western influence. Much of the country's inhabitants are international businesspeople who wish to send their children to American universities. The United Arab Emirates is a booming country with strengthening ties to the American government, improving access to student visas. The Emirates send approximately 3,000 students annually to the United States.

Kuwait City-Kuwait

This country is one of the most consistent performers in the Gulf region. For years, the United States have been a top destination for Kuwaiti students. The Americans maintain robust ties with the Kuwaiti government, making the market ideal for American institutions. This is a market recruiters **MUST NOT** ignore!

Manama-Bahrain

This is an opportunity to recruit two countries of students at one Expo! Bahrain is connected to Saudi Arabia by a causeway, and many Saudi students will attend the Bahrain Expo. These are qualified students who are very interested in attending American universities, and are aided by generous scholarships and endowments from the Saudi Ministry of Higher Education. Last year saw an eight-fold increase in undergrad applications from Saudi students. This is an excellent opportunity for schools to take advantage of this resurgence.
